PROFESSIONAL SUMMARY

At the confluence of Commerce and Technology — a uniquely dual-disciplined professional armed with BCom CA and MCA (AI/ML), representing a convergence as uncommon as it is strategic. Adept at translating complex datasets into actionable insights through AI/ML, business analytics, and data visualisation — bridging strategic thinking with computational precision. Driven by an innate curiosity to uncover patterns others overlook, and equally at ease navigating a business case as architecting a data pipeline. Seeking an entry-level role as a Business Analyst, Data Analyst, or IT Associate — where commerce intuition and technological fluency converge to deliver measurable organisational value.

EDUCATION

MCA – Master of Computer Applications

2024 – Present

Jain University, Bangalore

B.Com – Computer Applications

2021 – 2024

Dr. G.R. Damodaran College of Science, Coimbatore (Bharathiar University | NAAC 'A') **CGPA: 8.17 | First Class**
Certificate, Diploma & Advanced Diploma in Entrepreneurship & Small Business

Class XII – CBSE

2020 – 2021

SNS Academy, Coimbatore

85%

Class X – CBSE

2018 – 2019

Vel International Public School, Coimbatore

83%

TECHNICAL PROFICIENCIES

Programming: Python, Java (*Foundational*), HTML, CSS, JavaScript

Data & Analytics: SQL, Power BI, MS Excel (*Advanced*), Data Visualization, Machine Learning

Tools & Platforms: GitHub, Jupyter Notebook, VS Code, MS Office Suite

Domains Expertise: Artificial Intelligence, Machine Learning, Data Science, Natural Language Processing, Business Intelligence, Cybersecurity (*Fundamentals*), Digital Marketing

PROJECTS

Individual Projects

Guardian AI – Abnormal Activity Detection in CCTV

- Engineered a real-time CCTV surveillance system leveraging Computer Vision and Optical Flow Analysis to autonomously detect abnormal human behaviour.
- Deployed a multi-rule classification engine with an instantaneous audio-visual alert mechanism, distinguishing violent activity from routine motion with precision

Resume Screener – AI-Powered Recruitment Tool

- Architected a browser-based recruitment platform leveraging Claude AI to autonomously screen, score, and rank candidates across five weighted competency dimensions.
- Engineered a dynamic recruiter dashboard with real-time analysis, strength-gap visualisation, and a conversational AI interface for nuanced candidate interrogation.

Medicare – AI Powered Healthcare

- Architected platform integrating hospital discovery, specialist booking, real-time vitals monitoring, and Claude AI-assisted medical guidance.
- Engineered a patient dashboard encompassing medication tracking, health record management, and appointment scheduling via a modular React architecture.

Sales & Revenue Intelligence Dashboard

- Architected an end-to-end BI platform analysing 5,000+ sales records across 3 years, surfacing multi-dimensional KPIs through an interactive Streamlit and Plotly dashboard.
- Engineered an XGBoost forecasting model with lag features and Fourier-encoded seasonality to project a 6-month revenue outlook with confidence intervals.

Customer Churn Prediction & Retention Analysis

- Developed a Random Forest classifier, identifying tenure, billing, and contract type as dominant churn drivers.
- Deployed a Streamlit application delivering real-time churn risk scoring and data-backed retention strategies projecting 25–30% churn reduction.

HR Analytics & Attributive Insight System

- Analysed 1,470 IBM employee records using Python and statistical tests (Chi-Square, Point-Biserial), identifying overtime, income, and job role as dominant attrition predictors.
- Delivered a four-page Power BI executive dashboard and three data-backed HR policy recommendations to mitigate organisational churn

Group Projects

AgriConnect – Smart Agriculture Platform

- Contributed to an AI-powered agri-tech platform integrating crop yield prediction, soil health assessment, and real-time weather analytics to deliver actionable market insights for rural farming communities.
- Developed ML-driven recommendation modules connecting farmers with data-informed crop management strategies and market intelligence..

Sentiment Analysis – NLP Opinion Mining System

- Engineered a multi-class sentiment classification system leveraging NLTK and BERT to analyse customer reviews and social media discourse at scale.
 - Delivered quantifiable sentiment scores enabling brands to proactively interpret consumer perception and refine engagement strategies.
-

CERTIFICATIONS & COURSES

Highlighted Certifications

- IBM – Machine Learning with Python (Coursera): Regression, Classification, Clustering & Retrieval
- IBM – Probability & Statistics for ML & Data Science (Coursera)
- IBM – Hands-on Linux Command Line & Shell Scripting (Coursera)

- HackerRank – SQL (Verified credential in database querying)
- Microsoft – Power BI (Verified credential in data visualization & dashboards)
- GitHub – GitHub Foundations (Version control & collaboration)
- LinkedIn Learning – Edge AI: Tools & Best Practices for Building AI Applications
- LinkedIn Learning – Understanding Generative AI & Cloud Computing; Fundamentals of NLP
- NPTEL – Foundation Course in Economics & Management
- Cybrary – Introduction to IT & Cybersecurity
- Great Learning – Project Management

ADDITIONAL INFORMATION

Languages: English (*Professional Proficiency*); Hindi; Tamil

Soft Skills: Analytical rigour · Business acumen · Cross-functional collaboration · Meticulous attention to detail · Strategic problem-solving

Interests & Passions: Deeply fascinated by the evolving frontiers of Artificial Intelligence and emerging technology — actively engages in AI research, data storytelling, and tech discourse. Harbours a keen entrepreneurial instinct complemented by hands-on experimentation in digital marketing and competitive programming.
